

Without my XM I would more and likely listen to cd's only. I've been spoiled by the quality and variety of the service. With my XM have information that I just can't get with local FM service. If local stations want to compete then they got to go digital and reconsider their program line up and material. I just can't listen to the static and noise that my local stations offer. Even before satellite radio this was a problem and I knew it was a matter of time before someone came out with something better. They did and because of that I have XM and I want to keep it. Thanks XM satellite radio.

Sincerely,

Tommy Lucero
